ABOUT ME

As a software engineer, I prefer nothing more than translating functional requirements into **secure, stable** and **infinitely scalable** solutions. I'm convinced that good software makes the difference for every business—and I enjoy to combine my technical knowledge with my keen eye for detail to help build it.

When I'm not in front of my computer, I'm probably in the gym, squashing/playing tennis or in the city with friends.

WORK EXPERIENCE

Technical Consultant @ GX Software

Jan 2019 - present | Nijmegen, The Netherlands

Junior Software Engineer @ Service2Fruit

Mar 2017 - Dec 2018 | Geldermalsen, The Netherlands

PROJECTS (highlights)

VanillaHN @ Tonny Garić

2018 - present | Personal | tonnygaric.com/vanillahn

- An open source simple Hacker News client, built using only plain (vanilla) JavaScript.

tonnygaric.com v2 @ Tonny Garić

2018 - present | Personal | tonnygaric.com

- Designed and engineered the second major version of my personal website.

- Score of 125 out of 100 on *Observatory* by Mozilla.

FreshMonitor @ Service2Fruit

2017 - 2018 | Paid employment | service2fruit.com/freshmonitor

- Realised an average response time of less than 40ms by optimising SQL queries and retrieving data from the server asynchronously using Ajax;

- Helped to implement Mollie Payments and automated the process of starting and renewing FreshMonitor subscriptions.

Service2Fruit's Intranet @ Service2Fruit

2017 - 2018 | Paid employment | Confidential URL

- Reduced the time of several human processes, by automating them, leading to an average of 80% reduction in time to finish these processes.

Service2Fruit's Trading Platform @ Service2Fruit

2017 - 2018 | Paid employment | service2fruit.com

- Engineered major features, such as Transaction Dossier, which provides users one place with all information and communication about a transaction;

- Proposed and implemented scalable solutions to several issues identified by users and/or staff.
